Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by anticipated by Tanaka (US 6420823).

Tanaka discloses a color cathode ray tube (CRT: line 8 of column 1) comprising a rectangular front face (not shown), a rectangular shaped color selection mask (102 of figure 2), an active surface (area of mask having radius of curvature R1: figure 2) having perforated orifices (not shown), a peripheral border (area of mask that has radius of curvature R2: figure 2), a skirt (portion of the mask that is attached to a frame), and a rectangular frame (10 of figure 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2879

Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka (US 6420823) and Kaplan (US 2947899).

Tanaka discloses all the limitations of claim 2 except front face of the CRT to be flat. However, in the same field of endeavor, Kaplan discloses such a flat front face for a CRT. Thus, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide a flat front face for the device of Tanaka for the purpose of suitable/better viewing of a display/picture.

Regarding claims 3-8, Tanaka discloses the claimed invention except for specific measurements of radius of curvatures (hence specific shape of mask) and front face. However, in general, Tanaka have described theses shapes and radii of curvature. Thus, it would have been obvious to one having ordinary skill in the art at the time of the invention was made to obtain the claim range, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
